

**LEAD & COPPER RULE MONITORING AND REPORTING VIOLATION  
MANDATORY LANGUAGE - TIER III**

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**

410 WSC PWS 1940006 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During (LCR) (53) 2<sup>nd</sup> 6M2022, 1<sup>st</sup> 6M2022; (52) 1<sup>st</sup> 6m2022, we did not monitor or test for lead and copper and therefore cannot be sure of the quality of your drinking water during that time.*

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for [these contaminants], how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples will be taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were or will be taken
Lead and copper sampling tap samples 1 <sup>st</sup> 6M2022	20 / 6 months	9 out of 10	Jan 01, 2022 – June 30, 2022	01/06/2023 rtcd
LCR Water quality parameters 2 <sup>nd</sup> 6M2022	4 / 6 months	3	July 1, 2022 – Dec 31, 2022	06/07/2023 rtcd
LCR Water quality parameters 1 <sup>st</sup> 6M2022	4 / 6 months	2	Jan 01, 2022 – June 30, 2022	06/07/2023

**What is being done?**

Corrective action: We are working with TCEQ and have provided our current sample tap samples and return to compliance on 01/06/2023 and our LCR Initial sample and returned to compliance as of 06/07/2023.

We are working to correct the problem. For more information, please contact:
